First Class took advantage of the beautiful (and rare) good weather to do some outdoor maths. We brought our capacity instruments up to the pitch and had fun measuring and splashing.

## <u>Science</u>

\*

We had fun experimenting with materials to see which one had the best insulation properties. We tested card, newspaper, tinfoil, bubble wrap and cotton wool. Cotton wool proved to be the most effective at keeping the water warm. We planted nasturtium seeds. Most of them have sprouted into seedlings and as they sprout we bring them home. We also did an experiment to show how plants grow towards the sunlight.
